WHAT'S COMING?

01	INTRODUCTION OF THE PROJECT
02	WEB SCRAPING
03	TOOLS USED
04	INSIGHTS
05	DASHBOARD
06	CHALLENGES AND LEARNING

JOB ANALYTICS

STEP 1

Study the problem statement.
Inspecting LinkedIn Website.

STEP 2

Web Scraping
Using Selenium and BeautifulSoup

STEP 3

Data Cleaning,
Taking Insights Using SQL

STEP 4

Visualizing Data
Using EXCEL.
And driving
Conclusions

Beautifulsoup

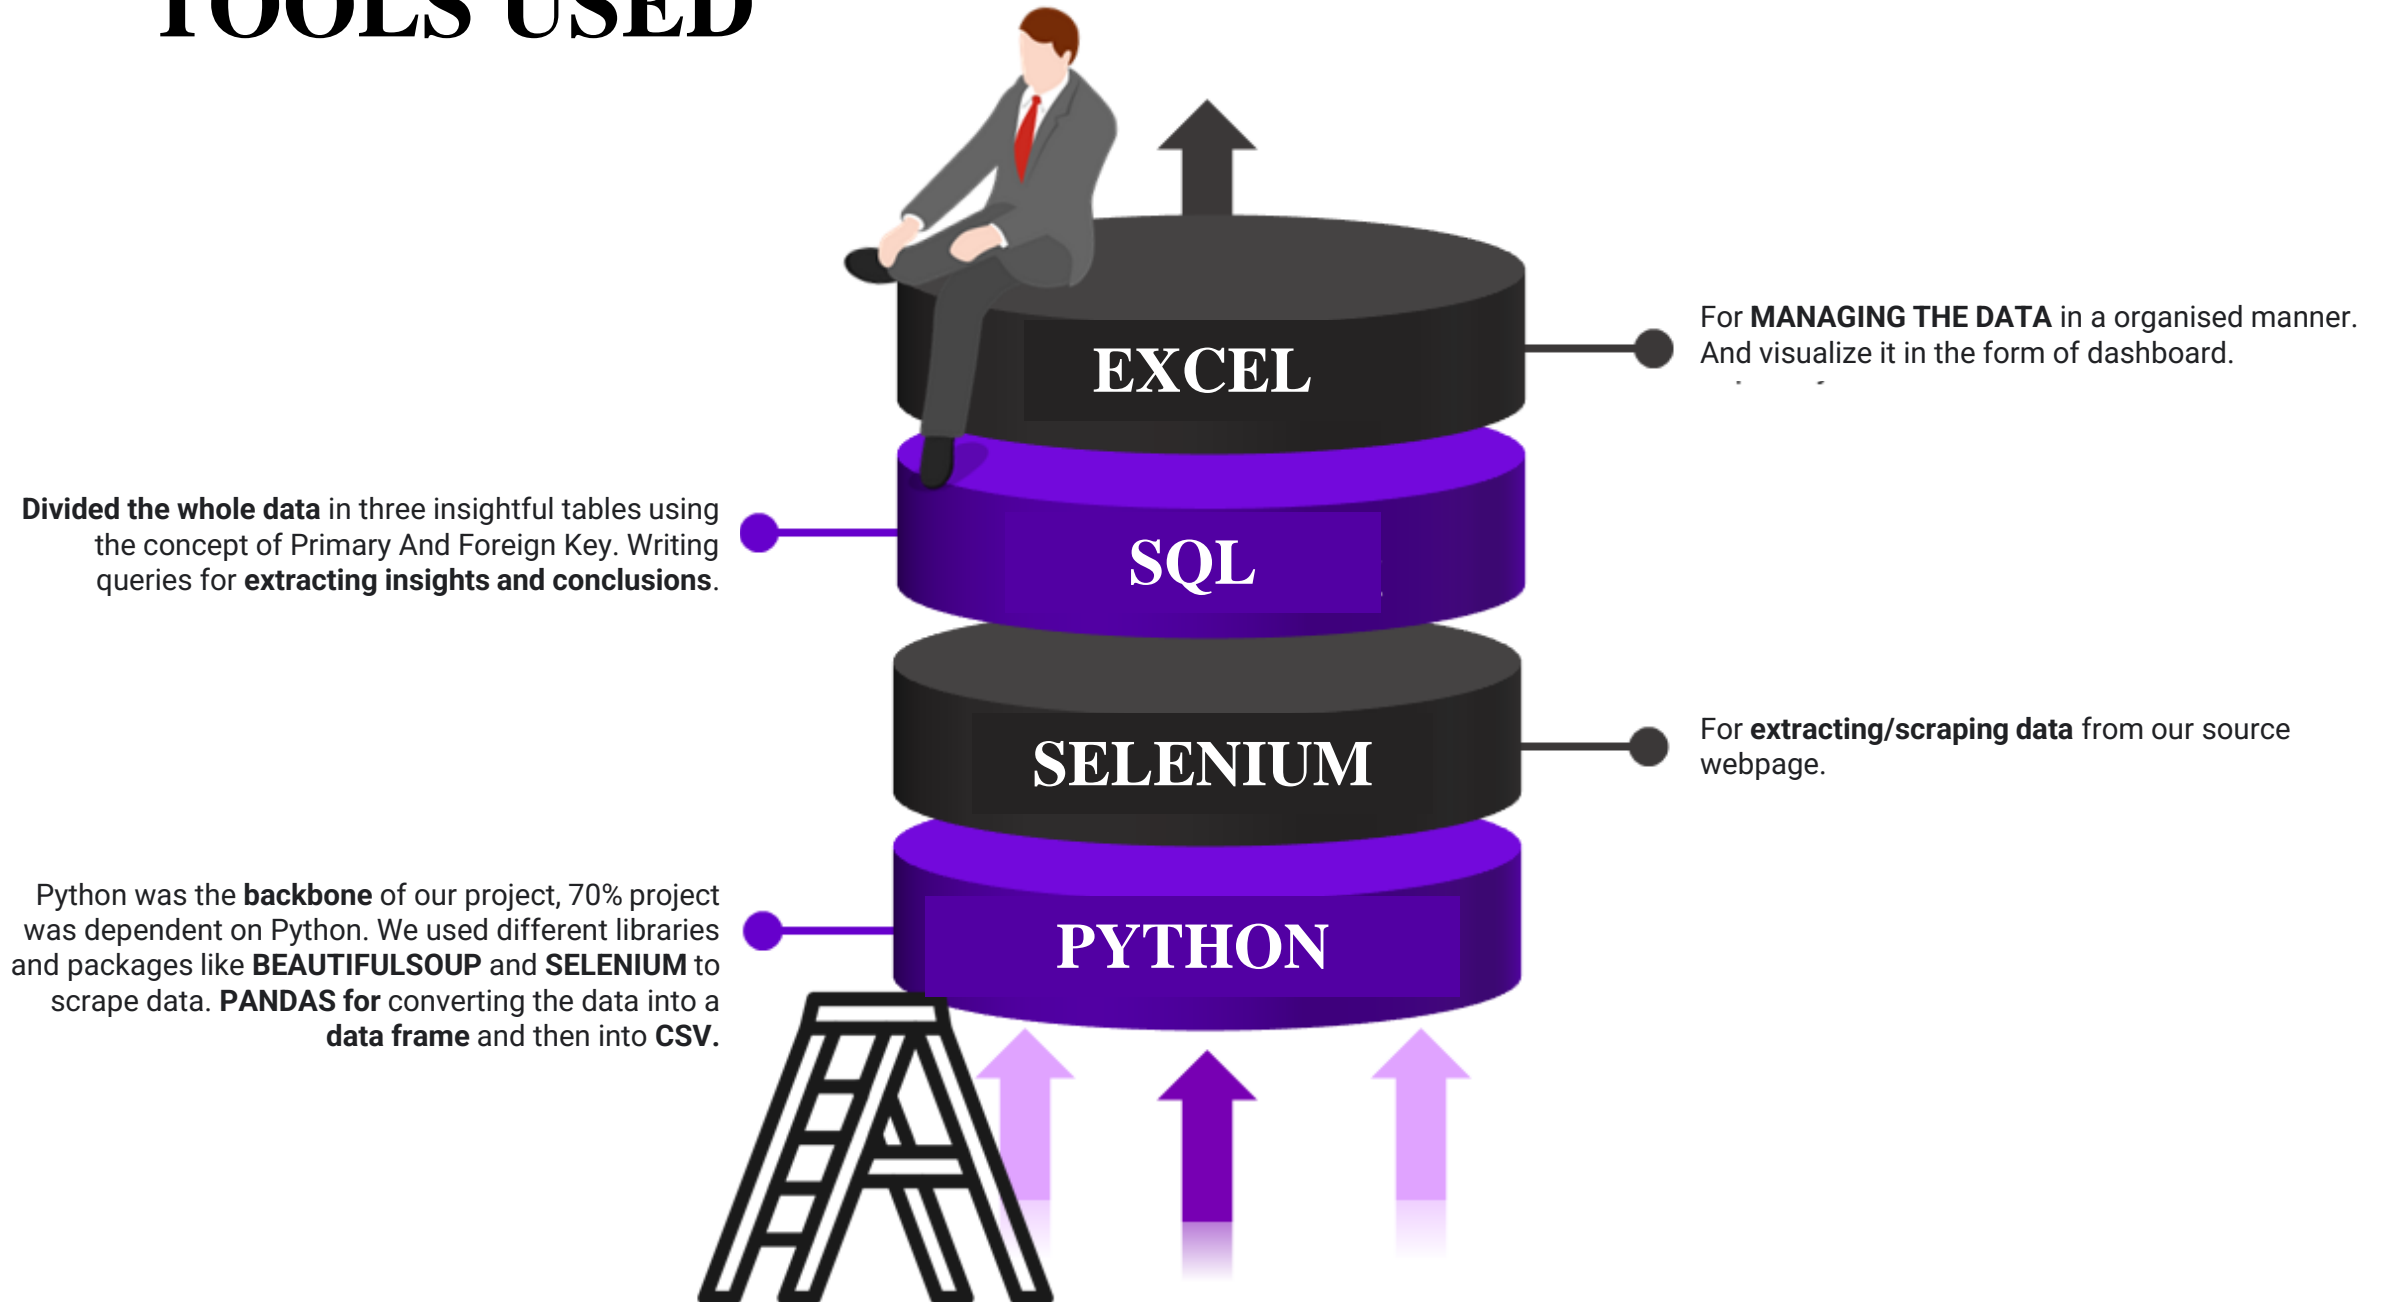

Selenium

Web Scrapping

TOOLS USED

INSIGHTS DRAWN

01 ANALYTICS VS SOFTWARE

We studied the trend of jobs being offered by various companies and found that there are **more job opportunities** for **Analysts** as compared to that of **Software** related jobs.

We observed that the **openings** in **large firms** are greater than that in comparatively **smaller firms**.

02 EMPLOYEES <100 VS >1000

03 CITIES OFFERING MOST JOBS

Our research and observations states that **METROPOLITAN** and comparatively more developed cities are leading in providing most jobs across **INDIA**.

MICROSOFT, IBM, THE GOLDEN RISE, AIR PRODUCTS INDIA and **AMERICAN EXPRESS** are the top 5 companies in terms of offering the number of jobs opportunities.

04 COMPANIES WITH MAXIMUM OPPORTUNITIES

05 LEVEL WITH MAXIMUM OPENINGS

From our research and analysis we found out that most of the companies **have not mentioned the level** of jobs on the platform. Besides that the highest number of openings are for the **ENTRY LEVEL JOBS**, and **director jobs were least**.

SOME MORE INTERESTING INSIGHTS

06 APPLICANT'S INDUSTRY CHOICE

Data Suggest that **IT SERVICES, SOFTWARE FIELDS, HEALTH CARE** and **AUTOMATION** are the industries more popular among the applicants.

Most of the applicants are aiming for leading companies in their sectors and a trend of less applications are seen in not so popular firms.

07 APPLICANT'S COMPANY CHOICE

08 ARE APPLICATIONS DEPENDENT ON FOLLOWERS

Applicants these days are really smart, they keep in mind a lot of factors before applying for a job .People **applying** for the jobs at companies which have **large number of followers**.

AMAZON being favorite among people on LinkedIn having most number of followers . **GOOGLE, MICROSOFT** and **APPLE** are next in the line in terms of LinkedIn followers.

09 COMPANIES WITH MAXIMUM FOLLOWERS

10 INDUSTRIES WITH MOST FOLLOWERS

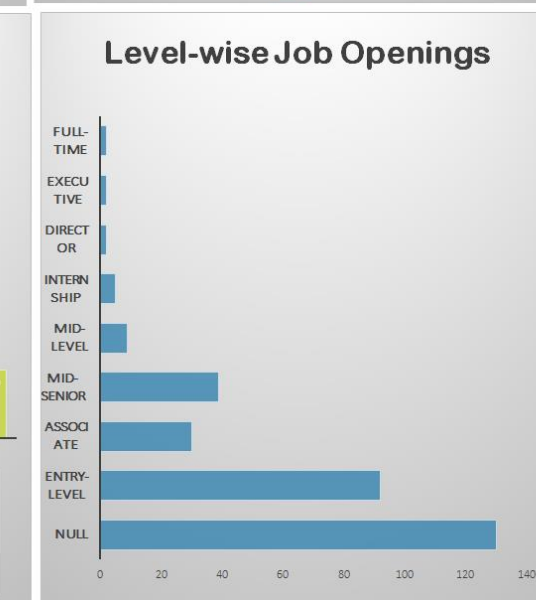

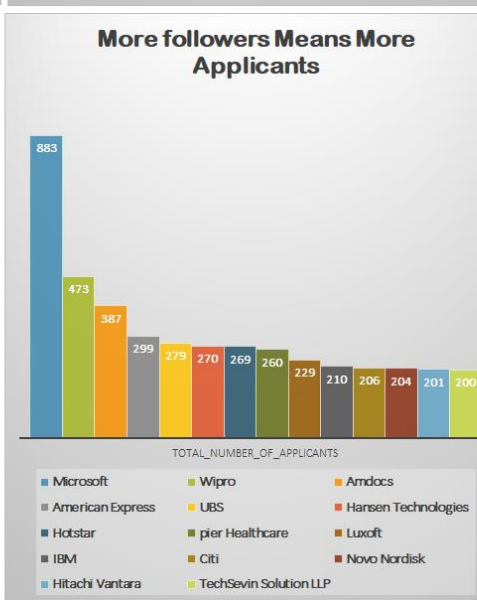

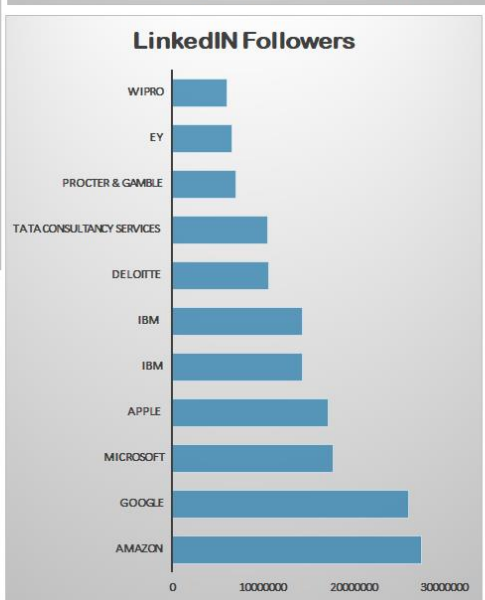

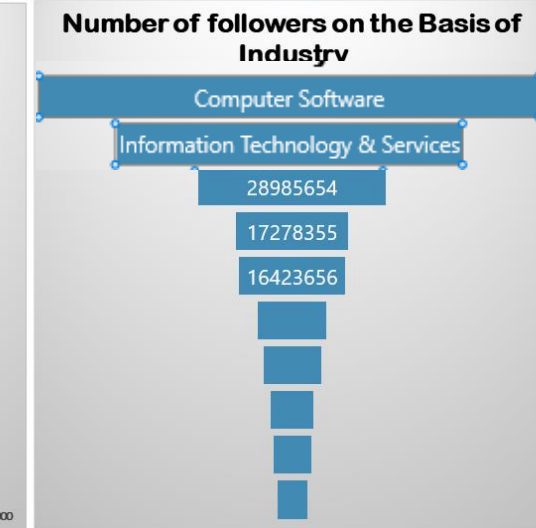

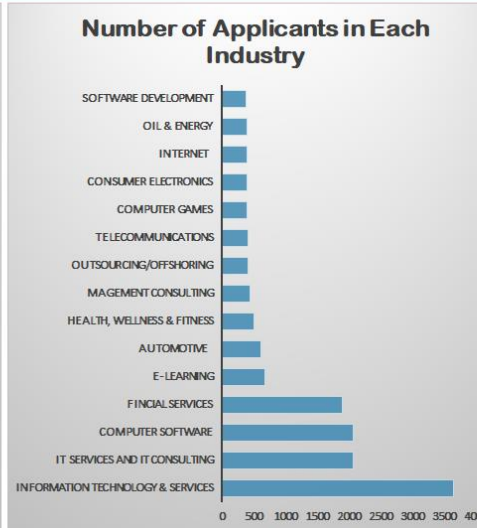

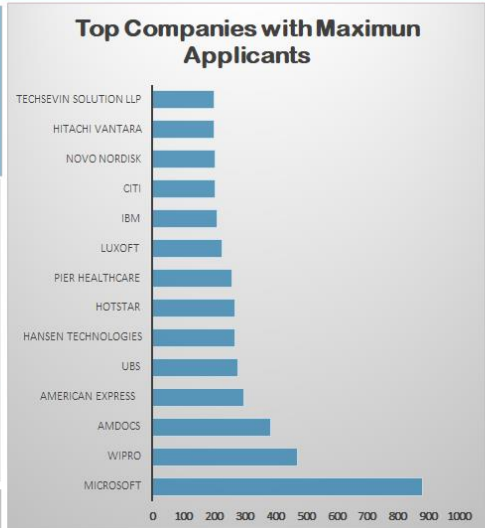

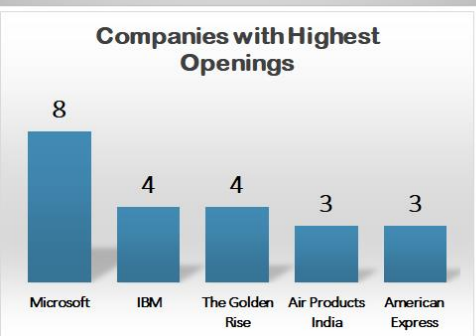

IT and **SOFTWARE** sectors are leading on LinkedIn in terms of followers, followed by **Consumer Electronics** and **Finance** sector.

CHALLENGES FACED

01

DATA SCRAPING

Data Scraping made our lives a roller-coaster ride. SELENIUM and BEAUTIFULSOUP were new to us. So that became the biggest challenge for us.

02

THE LOOPS

LinkedIn is a very smartly and complicatedly developed website. It was a tough ride to extract data from hyperlinks and iterating them in the loops

03

DIVIDING THE TABLES

We thought we were familiar with SQL until we came across the task of connecting the tables, by assigning the Primary and Foreign Key

WHAT WE ARE TAKING WITH US AFTER THIS PROJECT?

Major Learnings

WEB SCRAPING: Working knowledge on Python Packages like Selenium, BeautifulSoup, Requests, Keys, Drivers, Time, etc.

01

SQL is a lot more than what we thought it is. There is lot to be done before actually writing a query like connecting and organizing tables.

02

DATA CLEANING and Connecting tables by assigning PRIMARY KEY and FOREIGN KEY with references

03

Team Work and Handling Pressure of close Deadlines.

04

ANY QUESTION?

This is the END of our Presentation.
And your turn to ask us anything related to the project

Thank
you
